PROFESSIONAL SUMMARY

Data Analyst and active Data Science student with hands-on experience in Python, SQL, Power BI, Machine Learning, and large-scale data analysis. Built end-to-end analytics and predictive modeling projects using datasets exceeding 970,000 records. Skilled in data cleaning, exploratory data analysis, dashboard development, and machine learning model evaluation. Seeking opportunities to apply analytical and problem-solving skills in data-driven environments while continuing to advance technical expertise in data science.

SKILLS SUMMARY

- **Data Analysis:** SQL, HTML, CSS, Pandas, NumPy, Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Feature Engineering
- **Machine Learning:** Scikit-Learn, Classification, Regression, Cross-Validation, Hyperparameter Tuning, Model Evaluation, SMOTE
- **Visualization & BI:** Power BI, DAX, Excel, Matplotlib, Seaborn, Plotly
- **Tools:** Jupyter Notebook, Streamlit, VS Code

PROJECTS

India Weather Analysis & Rainfall Prediction |

- **Objective:** Processed and analyzed 970,000+ weather observations collected across multiple Indian states.
- Performed large-scale data cleaning and handled 200,000+ missing values using statistical imputation techniques.
- Conducted exploratory data analysis to identify rainfall patterns, seasonal trends, and regional climate variations.
- Created interactive Power BI dashboards to visualize weather insights and rainfall distributions.

Sales Analytics Power BI Dashboard |

- Designed and developed an interactive Power BI dashboard to track KPI metrics, revenue trends, and overall sales performance.
- Utilized DAX to create calculated columns and custom measures to uncover actionable business intelligence.

Cancer Risk Classification Model |

- Engineered a machine learning classification model to predict cancer risk probability based on clinical datasets.
- Implemented SMOTE to address class imbalances and utilized cross-validation to ensure robust model performance.

Drug Categorisation Pipeline |

- Developed a predictive machine learning pipeline to accurately categorize pharmaceutical drugs based on patient metrics.
- Applied advanced feature engineering and EDA to optimize classification accuracy and model reliability.

EDUCATION & CERTIFICATIONS

Data Science Certification | **IN PROGRESS**

Bachelor of Computer Application | **DEGREE CERTIFICATE**

Vocational Higher Secondary School (VHSC) | **FTCP CERTIFICATE**

March 2025

March 2022
